Tech presentations from Armenia

Rafayel Ghasabyan, President, TACTUN

(stealth mode, [a Rafa Solutions company](#)) - its technology will democratize the Industrial IoT market by introducing a platform that includes universal controllers and software-as-a-service web application builder. This will reduce the cost of industrial electronic products, allow those traditional businesses to go digital and start earning recurring revenue. TACTUN will allow the domain experts to automate their products without any software programming knowledge.

Haykuhi Tangyan, Director, Volo

[VOLO](#) - a software development firm that, within the scope of its full-cycle custom software development services, partners with companies from the sectors of healthcare, logistics, consumer electronics and more to build mobile IoT applications.

13:40/11:40 CET

Q&A

14:00/12:00 CET

End of session

Presenter: Stefan Kägebein, Regional Director Eastern Europe,
German Eastern Business Association

Presenter: Meri Navasardyan, Managing Director DWV
German Business Association Armenia
